RE: Notification of Hazardous Waste Activity
US Veterans Administration Med Ctr - EPA ID #: CO7360010261

This letter will serve to inform you that the Hazardous Materials & Waste Management Division, Colorado Department of Health and Environment, has received correspondence notifying us of the changes to your company/facility as indicated below. This is an acknowledgement letter only; keep it for your files. The areas listed below have changed per your request:

➤ ***Inactivated ID# - Facility is no longer generating hazardous waste***

Any change in location would require a new Notification of Hazardous Waste Activity (EPA Form 8700-12) to be filed, as EPA ID numbers are location specific. Failure to have an EPA ID number for a new location or use of the wrong EPA ID number in shipping hazardous wastes may result in Enforcement Action under sections 25-15-308 to 310 of the Colorado Hazardous Waste Act (sections 25-15-101 to 515, C.R.S.) In accordance with Part 99 of the Colorado Hazardous Waste Regulations (6 CCR 1007-3), this office must be notified in writing at the above address if any of the following changes occur: 1) mailing address; 2) name of facility; 3) generator status or other notified activity; 4) contact name or phone number; 5) ownership; or 6) site is closed.

Please be aware that the handling and management of hazardous waste, including the generation, transportation, treatment, storage, and disposal of hazardous waste, is regulated under the Colorado Hazardous Waste Regulations, Parts 260 through 268, Parts 2, 99 and 100. A copy of the *Guide to Generator Requirements of the Colorado Hazardous Waste Regulations* is available online at <https://www.colorado.gov/pacific/cdphe/hwguidance> select the link: "Applicable to all generators." And a copy of the regulations (6 CCR 1007-3) is available at <https://www.colorado.gov/pacific/cdphe/hazardous-waste-regulations>.

If you have any questions, or need further information, please contact me at (303) 692-3360.

Sincerely,

Laura Gurule

18. Comments (include item number for each comment)

The information within this form is infrastructure sensitive and is for official use only. Due to the 2020 decommissioning and closure of the old Denver VA Medical Center in 2020, hazardous waste generation and storage was halted in the central accumulation area located in Building 1 in the summer of 2020. Remaining wastes were expediently and compliantly removed through our contract hazardous waste vendor, Stericycle. The site occupied by the Denver VA Medical Center was then divided into north and south campuses so the VA could maintain a section of land for a possible future clinic. A site plan is attached for reference. The north campus was to remain with the VA for the immediate future; the southern half, which included Building 1, was to remain off-line permanently. Remaining emergency generator diesel II fuel was transferred in its entirety from underground ground storage tanks on the south campus to the existing underground storage tank farm immediately to the west of Bldg 8 on the north campus. These regulated tanks will continue to be maintained and monitored in accordance with State of Colorado regulations. On the north parcel, the VA will also maintain a very small, secured hazardous waste storage area in a part of existing Building 18. Hazardous chemicals have been mostly removed. Spill response kits and secondary containment remain.
